

Print and emboss your greeting in 3 different styles.

This download includes a variety of greetings in 3 different fonts which, once printed, can be photocopied and enlarged or reduced to suit your requirements.

If you wish to emboss directly i.e. by putting your parchment over the pattern, the words need to be first printed in mirror image.

To do this, choose 'layout' in your printer settings and then check the box 'mirror image'. This will print the words backwards.

Next lay the sheet on a rubber embossing mat and then place the parchment on top. Rub the parchment with a tumble dryer sheet then, using a PCA Scriber emboss the words directly over the pattern. This must be done firmly to give a crisp embossing.

Alternatively, you can use either a micro ball or small ball tool. This will give thicker letters but not be quite so crisp and white as if using a scribe.

The Outlined greetings can be done with either a very fine black fineliner pen, fine gold/silver/any coloured fineliner/gel pen or, preferably a mapping pen and gold ink. Daler Rowney metallic inks work particularly well. For a more sparkly finish use Windsor and Newton Gold.

Finally, have fun!

Purely Parchment
