

# *Purely Parchment*

## *Orange Lily*

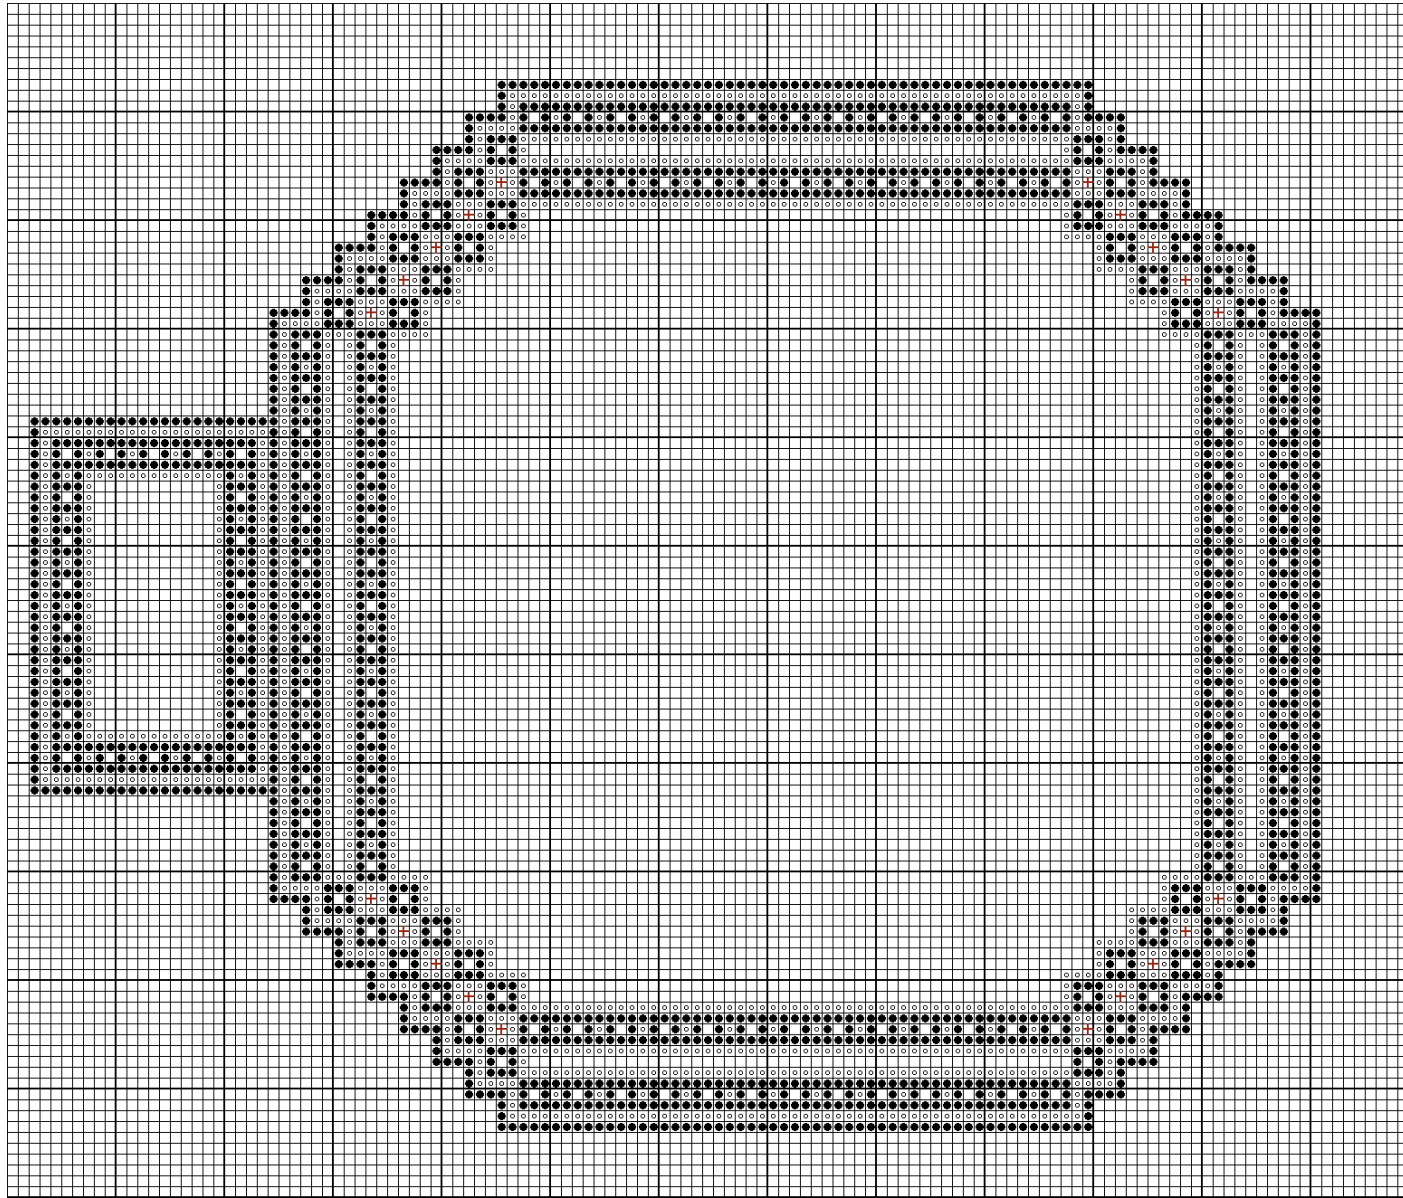

The Grid design was worked on a PCA Bold Straight Grid, but any size of straight grid can be used. If using a smaller one, just reduce the size of the lily by photocopying.

Work the grid border first before the lily. Emboss it but don't cut it out until the lily has been worked. Refer to the picture for the cutting and embossing patterns.

The lily was worked using Faber Castell Polychromos pencils i.e. a dark and a medium shade of orange and a cream for the petals and 2 shades of green plus a cream for the leaves. A blending pencil (Lyra Splenda Blenda/Derwent Blender) was used to blend the colours. The stamens have been worked with a 0.05 fineliner pen. The work was then embossed on the back, just for shape.

If you would prefer, this design could be painted with a medium of your choice or simply embossed without colouring. Whatever you choose, have fun.

● Perforate

○ Emboss on Grid

+ Emboss lines with Scriber
