

Ribbon Bookmark

3 Gridwork Versions – 1 Pattern

Equipment

PCA Bold Straight Grid
Thick perforating mat
PCA Quad Tool
PCA Small Ball Tool
PCA Small Scallop Edge tool
PCA Large Sun tool
Rubber embossing mat
Parchment Scissors
Pergamano bookmark sleeve or equivalent
Narrow Ribbon the width of the slots

Instructions

Rub Both sides of Parchment with tumble dryer sheet. To make perforating smoother place the dryer sheet between the perforating mat and the grid and perforate through it.

Perforate and emboss as indicated on grid chart and cut out perforations as in the illustration or as desired.

Using the Scallop Edge tool perforate around the outer edge. Remove the waste parchment and emboss a small dot in the centre of each scallop.

Thread the ribbon through the slots as shown in the picture

Cut a piece of card to the size of the bookmark and attach to the parchment using a little pva glue or double sided tape where the ribbon is secured on the back. This will ensure it does not show on the front.

Slip into bookmark sleeve.
